Disabling Antivirus Before an Exam

If your computer contains an anti-virus software (e.g. Norton, McAfee, Zone Alarm, etc.), it is highly recommended to learn how to disable it before your exam.

In most cases, you can simply disable your anti-virus temporarily by right-clicking the anti-virus icon in the System Tray beside the clock and selecting Disable. We recommend that you do this prior to the start of each exam.

Each link below explains how to disable the anti-virus software:

- AVG Internet Security 2011
- Bit Defender
- CA Internet Security
- Kaspersky
- McAfee Total Protection
- Norton 360
- Norton Anti-Virus
- Norton Internet Security 2011
- Panda 2011 Anti-Virus
- Rising Anti-Virus
- Spyware Doctor
- Trend Micro Internet Security
- Trend Micro Anti-Virus Plus Anti-Spyware
- Webroot
- Zone Alarm
